

Fully Automatic Button Machine (prong snap Button and plastic snap button)

Application:

This Machine is applicable for automatic attaching of prong snap button and plastic snap button

Safety:

Advanced finger protection device. If the operators' finger is detected under the mould during operation of this Machine, it will stop operation immediately and automatically return to the shut down position in order to protect the fingers.

Feature:

1. Provided CE certification and Security finger protection function with passing EU standard.
2. Auto button feeding device (avoid feeding buttons manually by hand to keep safety)
3. Auto attaching pressure buffer regulator (no needed adjustment for garment thickness)
4. Automatic counter
5. Precise attaching position of laser light pointer with adjustable brightness
6. Continuous attaching mode and discontinuous attaching mode supported
7. Auto and manual mode supported for machine adjustment
8. Adjustable positioning plate applicable to prong snap button and snap button)
9. Castor installed for easy movement
10. Installed left foot pedal conforming to human ergonomics
11. Servo motor with speed adjustable and constant torque adopted
12. Attaching speed is adjustable
13. Operation period is adjustable for feeding motor

Technical Parameters:

Drive mode:	Servo motor
Max. power:	0.75 KW
Voltage:	220V
Frequency:	50/60 Hz
Speed:	200 times/min
Throat depth:	50 mm
Throat height:	18 mm
Operation height:	880mm
Weight:	80 kg
Dimension WxDxH:	500x500x1300 mm
